EP Molybdenum Disulphide Grease (Typical Product Data Sheet) (XG-L8 EP MO)

Molybdenum Disulphide is of comparatively lower friction index, especially for heavy duty, with better high temperature capacity for short period of high temperature. Thus this product is specifically used for lubrication of parts in heavy duty, and high temperature for short period of time.

Features and Benefits

NLGI Grade No.3
Service Temperature Range : -20 to 120 Deg.C
Thickner – Lithium

Applications

Applicable to lubrication of heavy duty gears and bearings for machines of steel rolling, mining industry, construction, heavy duty crane, plastic injection etc. also for parts under shock load.

The figures quoted are typical, do not constitute a specification and are subject to the usual manufacturing tolerances.
